PIONEERS IN DIGITAL PATHOLOGY

By Lisa-Jean Clifford

With the privilege of witnessing the digital pathology industry flourish, Gestalt Diagnostics chose to be daringly original. Success, we believe, doesn't come from imitation but from being true to oneself. Our motto is clear: Be original. Lead, don't be led.

Daring to Be Original and the Innovation Journey

Our journey began with a vision to bring innovation to pathology. Driven by our commitment, we created PathFlow®, a digital pathology platform setting new industry standards. It's more than a product; it's a testament to our daily dedication. With patents and accolades, our originality shines.

PathFlow seamlessly integrates cutting-edge technology into pathology. It provides an intelligent, configurable, vendor-neutral, and AI-driven digital workflow, enabling pathologists to diagnose* diseases faster and more efficiently. Our PathFlow solution offers professional, education, and research modules, allowing flexibility in matching your facility's digital needs in a single solution. This frees pathologists from tedious, repetitive, and manual tasks, allowing them to focus on their expertise – providing invaluable experience where it matters most.

Often Imitated, Never Duplicated

Imitation is flattery, but we've been imitated without duplication. Our unwavering commitment to excellence sets the gold standard in digital pathology.

In an era where imitation can stifle innovation, we stand as a testament to the power of originality. Our journey inspires, leaving imitation behind and shaping the future of healthcare.

STRATEGIC PARTNERSHIPS ARE THE DRIVING FORCE BEHIND INNOVATION AND PROGRESS

By Charles Best

Gestalt's recent developments underscore the significance of these alliances. We have recently introduced two prominent new clients to our growing list of digital customers, with whom we can openly disclose our affiliations. ARUP and Sagis, both esteemed for their exceptional pathology services, have opted for Gestalt's acclaimed PathFlow platform.

Additionally, we have unveiled the commercial availability of our proprietary Mitotic Cell Counting Algorithm, which is accessible through our strategic alliance with Pramana. Notably, our algorithm seamlessly integrates into their scanning systems. Furthermore, Intermountain Biorepository has expanded its capabilities by incorporating our DICOM compatibility, in alignment with our collaborative integration efforts alongside Pramana.

REVOLUTIONIZING THEIR PATHOLOGY SERVICES, SAGIS ADOPTS DIGITAL PATHOLOGY AND AI

USING PATHFLOW, WE WILL ALSO BE ABLE TO GROW AND CONTINUE TO SERVE OUR CLIENTS AND PATIENTS IN THE BEST WAY POSSIBLE.

COLLABORATION BRINGS DICOM, AI, IMAGE ANALYSIS, AND DIGITAL PATHOLOGY IN SINGLE, STREAMLINED, COMPREHENSIVE OFFERING

A Message from the CEO

Gestalt Diagnostics' journey in advancing digital pathology is fueled by the collaboration of dedicated teammates, investment partners, and passionate customers. We are dedicated to consistently pushing the boundaries of innovation, with our focus on continually advancing PathFlow®, which is a leading solution in the evolution of digital pathology.

These achievements are not just milestones for Gestalt; they represent our continued momentum in driving meaningful

change in our space. And I am incredibly proud to be part of a team that is at the heart of this transformation.

Let's continue to innovate, inspire, and impact the world of healthcare together.

Onward and upward,

Nav
