

BECAUSE DAYS MATTER

- ✓ In Speed of Diagnosis*
- ✓ In TAT
- ✓ In the Lives of Patients

PATHFLOW[®]

ALL-INCLUSIVE AI-DRIVEN DIGITAL PATHOLOGY PLATFORM

ABOUT GESTALT

Gestalt transforms healthcare through PathFlow[®], an intelligent, configurable, and vendor-agnostic digital workflow with fully-integrated custom Artificial Intelligence solutions, AI image analysis, and machine learning. PathFlow[®] enables pathologists to detect and diagnose* disease, including cancer, with more accuracy and speed, facilitate global collaboration between experts, and aid drug discovery and development.

ELEVATING THE PATHOLOGY SPACE

Gestalt provides an award-winning, pathologist-proven pathology solution. PathFlow[®] implements AI-driven, dynamic workflows that are highly flexible and scalable. Closely partnering with each customer, Gestalt supports their specific needs during new digital adoption or through a transition. Our development philosophy and expertise drive impactful workflows that significantly increase efficiency, streamlined workflows, and the pathologist's cockpit for a fully integrated, single point of access. PathFlow[®] combines robust, dynamic workflows on a single platform that supports:

- ✓ AP Module: Full support for clinical use, Primary diagnosis*, tumor boards, consults, and live collaboration.
- ✓ Education Module: Automatically anonymize cases for use in teaching, training, credentialing, and onboarding of students, residents, and pathologists.
- ✓ Research Module: For use in studies, development, and research to support precision medicine and drug development.

*Research Use Only (RUO) unless following CAP guidelines for LDT.

EDUCATION MODULE

Continuing Education

Complete control & customization of continuing education offerings.

Organization Wide | Remote | Global

Onboarding

New hires or adopting new technology - create classes, lessons, and scenarios to meet the needs of your staff.

Competency

Research evolves - new revelations, diseases and treatments are discovered daily. Teach new concepts and reinforce training with skills tests and competency tracking for real case scenarios to achieve peak performance.
